Institute of Acoustics Certificate of Competence in Workplace Noise Assessment

Course Content

- The current regulations relating to noise at work.
- How to carry out and report measurements of noise levels in workplaces.
- Assessment of daily noise exposure levels of employees from information about measured noise levels and work patterns.
- Selection of suitable and effective hearing protectors.
- Basic noise control techniques and identification of areas where noise reduction is required.
- Assessment of the effectiveness of any noise control measures

Who should attend?

The Institute of Acoustics is the UK's professional body for those working in acoustics, noise and vibration. The IOA Certificate of Competence in Workplace Noise Assessment has been designed to enable you to assess the noise hazards in a workplace, identify means of reducing exposure and to advise and assist employers to meet the requirements of the Noise at Work Regulations 2005.

This course is intended for all those concerned with the prevention of hearing damage at work and satisfies the Institute of Acoustics' requirements for competence in workplace noise assessment, including safety professionals, managers, consultants and environmental health officers.

Duration

5-days including examination and practical assessment. Candidates will also be expected to undertake private study outside of the teaching times.

Venue

- In-company (Call for Details)

Tutor

Dr David Wenham, BSc, MSc, PhD, DipSH, DipLaw, AdvDipEd, MRSC, C.Chem, CFIOSH, MILT

Entry Requirements

There are no formal entry requirements, however candidates should be numerate, be able to manipulate simple equations and be able to communicate simply and clearly. All candidates must possess and be able to use a scientific calculator with logs, antilogs and memory facilities.

Assessment

The assessment consists of an examination and a practical assessment.

EXAMINATIONS

April and November each year.

PRACTICAL ASSESSMENT

The aim of the practical assessment is to test your ability to complete a noise assessment of a workplace.
