

Oil and Gas Success with RRC

Nasir Iqbal is one of many RRC students who have achieved success in the NEBOSH International Technical Certificate in Oil and Gas Operational Safety.

Nasir was a recent graduate; he completed a BSc in Electrical Engineering shortly before registering for the NEBOSH Oil and Gas course with RRC in London. He left university to pursue a career in the oil and gas industry and, with a keen interest in health and safety, the NEBOSH Oil and Gas course seemed like the perfect next step.

Nasir Iqbal - RRC student on the NEBOSH Oil and Gas classroom course in London (July 2012)

He opted to study the classroom course with RRC because he wanted to study in the most efficient way possible. He was delighted when RRC took this on board; *“I registered three weeks before the course began and wanted to get started straight away; I explained this to the team at RRC and received my printed course materials within two days – I was amazed by how quick and professional the service was.”*

“...he was more than just a tutor – he really took an interest in my continued success”

When discussing the course, Nasir was quick to praise his tutor – Hasan Al Aradi (Director of RRC International). *“When I signed up for the course I was concerned I would struggle, but as soon as the course began I was completely confident I’d be successful. I found the tutor to be both very dedicated and knowledgeable. His experience in the industry and his friendly approach made the course enjoyable as well as informative”.*

Nasir also explained that the support offered was not simply tailored to helping him to pass the NEBOSH exam; *“My tutor encouraged me to continue in my studies beyond the NEBOSH certificate course and I am now undertaking an MSc in Petroleum Engineering ... he was more than just a tutor – he really took an interest in my continued success.”*

“...the RRC team know what customer service is all about!”

The support from RRC extended beyond the classroom; *“I always felt like RRC were interested in my success; from the moment I enrolled on the course I received regular communications about my course, my exam and my results...the RRC team know what customer service is all about!”*, explained Nasir.

Nasir attended the classroom course for the NEBOSH Oil and gas course in London and passed his exam first time; he’s now enrolled on the MSc in Petroleum Engineering at London South Bank University. Details of the RRC NEBOSH International Technical Certificate in Oil and Gas Operational Safety classroom courses - available in London, Bahrain, Dubai and Saudi Arabia - can be found on the RRC website at www.rrc.co.uk. RRC have recently published the first NEBOSH Endorsed textbook for this course: ‘The Management of International Oil and Gas Health and Safety: A Guide to the NEBOSH International Technical Certificate in Oil and Gas Operational Safety’ (RRC Publishing, July 2012) which is available to purchase from RRC and various international booksellers.

RRC would like to wish Nasir the best of luck with his continued studies.
