

Discount on training

Visitors to the **RRC Training** stand at Health & Safety North are told they can expect an entertaining experience that will demonstrate the company's professional knowledge and experience.

RRC will be running a prize draw, giving all visitors the chance to win a free NEBOSH Certificate Course at the Chorley, Newcastle or Birmingham training centres.

On the stand there will be leaflets which offer visitors a 15% discount on all of RRC's NEBOSH, NVQ, IOSH, IEMA, and CQI courses.

Wide range of PPE

DuPont Personal Protection's stand will include the Tyvek Classic Xpert disposable coverall, the new FallX fall arrest coverall and a range of arc flash protective solutions using Nomex.

Tyvek Classic Xpert is said to offer an exceptional level of wearer and process protection. Resisting 99.2% of dust and three times more liquid than its predecessor, it is reported to be one of the best coveralls in the Type 5/6 category.

The Floeire FallX fall arrest coverall with Nomex incorporates a harness and a heat and flame resistant coverall. The entire suit will absorb the force of a fall and thus reduce wearer injury.

DuPont and Dale Techniche in the DuPont Nomex Partner Programme, along with distributor J & K Ross, have combined expertise to develop a range of arc flash protective solutions. Products on show will include long coats, bib and cargo trousers, hoods, coveralls and polo shirts using innovative arc flash protective fabrics and the Paulson arc flash visor with Nomex chin seal. **Stand 86**

Visitors to **Scott Safety's** stand will be able to view the latest developments in sensory, gas and head protection, including the Spirit PAPR, Protégé ZM Single Gas Monitor and First Base 3 range.

The Spirit PAPR, commended at the BSIF product innovation awards, is an intelligent respiratory system that will provide advanced protection in almost any environment. It operates with either particle or combined particle and gas filters, allowing the user to adjust air flow to match personal preferences

Respiratory, gas and head protection products

and environmental demands. It works with a range of headtops developed to improve wearer comfort and acceptance.

The Protégé ZM Single Gas Monitor delivers high performance in a small, lightweight and ergonomically designed package. It is a zero maintenance solution, and has a high performance battery which provides two years of operation.

The new First Base 3 baseball-style bump cap range affords comfort and protection and comes in a range of styles. **Stand 8**

Award winner

CleanSpace2 has been awarded 'Winner, Product Innovation 2013' at the annual BSIF Safety Awards.

CleanSpace2 is a breath responsive, powered air filtration respirator that maintains a positive pressure inside the face piece and delivers filtered air, on demand, to the user. It is easy to use, comfortable to wear, compact, and compatible with most other PPE being worn.

The respirator is available to buy throughout the UK and Europe. For

Sound and vibration meters

Svantek will be exhibiting its SV104, the company's smallest noise dosimeter, which, despite its compact size, boasts all the capabilities and functions of a full-size dosimeter.

Featuring an inbuilt tri-axial accelerometer for vibration shock detection, the SV104 uses a virtually indestructible, MEMS microphone. It has audio recording and octave band analysis for hearing protection selection.

Also on show, Svantek's power-packed SVAN 971 sound level meter and analyser is equally compact and lightweight. It offers audio event recording, detachable pre-amp and microphone, a dosimeter function

and a vast time/history logging capability, and is suitable for industrial hygiene, short period environmental, and general acoustic noise measurement.

Visitors will also be able to view the finely-tuned SVAN 977. Simple to use to measure and analyse both sound and vibration, it works effectively in workplace health and safety and/or environmental monitoring. Like the 971, the 977 provides broadband results with all the standard weighting filters. **Stand 78**

Visit the Doctor

Visitors to the **Cirrus Research** stand will be able to experience the new 'Noise Doctor' concept, a three-step remedy for noise monitoring solutions that comprises advice, product and support.

The company will also be showcasing its Optimus sound level meters and its doseBadge wireless personal noise Dosemeter for occupational noise.

James Tingay, group marketing manager, said: "Thanks to the Noise Doctor, visitors to our stand can bring along any of their noise measurement issues and we will offer straightforward advice as we work through the best option for them. **Stand 70**

Footwear features

A DDR sole unit with integrated bump cap will be launched at this year's H&S North by **Goliath Footwear** and YDS.

The sole is injected to the uppers. The company says this creates up to 55% better bond strength (than the standard) between the uppers and the sole unit. Abrasion resistance is also boosted.

Within the new product designs is a quick-release foundry boot for aluminium foundries.

A new range of metatarsal protective boots with DDR injected soles will also be launched that integrate a high technology material - D3O - and, for the utilities sector, a new linesman boot design will be on show. **Stand 158**
