

## Sustains high standards

Manufacturer of one of Europe's widest range of fragment retention lamps GlassGuard is pleased to report that it has passed an annual ISO 9001:2008 audit inspection. With no non-conformities reported in the manufacturer's quality management system (QMS), GlassGuard's reputation for high standards of care and attention to detail has been confirmed.

No stranger to maintaining high standards, its GlassGuard BlackBand fragment retention lamps are manufactured to EN 61549, the recognised industry standard which incorporates requirements for fragment retention lamps. GlassGuard was instrumental in the implementation of EN 61549 which brought an end to the production and availability of inferior and dangerous shatterproof lamps in the market.

## Life-saving donation

Evac+Chair International is spreading the word for greater awareness of automatic external defibrillators (AEDs) on a global scale, with the donation of a CardAid AED for the Clipper 13-14 Round the World Yacht Race.

AEDs offer vital on-the-spot instructions on how to save an individual who is suffering from sudden cardiac arrest. Evac+Chair International donated the CardAid

AED and a mini stretcher after learning that a member of staff of longstanding client RM Education would be participating in the race.

The essential items will be onboard a yacht, travelling alongside 20 crew members for one year. The competition will see individuals from all walks of life racing across oceans covering six continents.

## ROSPA recognition

Konecranes' already exemplary record within the field of health and safety received further recognition recently, when the UK operation received a Silver Medal at the Royal Society for the Prevention of

Accidents 2013 Occupational Health and Safety Awards.

Recognising corporate commitment to accident and ill health prevention, the award made to Konecranes – a leading supplier of overhead cranes and lifting equipment and operators of UK's largest crane service network – was within the Achievement category. Konecranes was a previous Gold Medal recipient at the ROSPA Awards in 2011/2012.

Konecranes' Pat Campbell said: "Our ongoing approach will be to deliver improved performance by fostering a safety culture right across the business."

## RRC boosts team

Having spent 14 years promoting health, safety and environmental training and consultancy, Gareth Lewis has joined RRC International's senior management team to head up corporate client relations for the UK and Europe. Gareth says: "I'm really excited to have the opportunity to work for one of the health and safety sector's truly forward-thinking consultancies, which places such high importance on client relationships and quality of materials and delivery, as well as having all the relevant products on the market to meet clients' HS&E training needs.

"Over the coming months, I will be focusing on building on our strong relationships with existing clients and developing a clear angle to promote, far and wide, our corporate capabilities in e-learning, face-to-face training and consultancy."

## INDUSTRIAL SCIENTIFIC

## Awards finalist

Industrial Scientific, a global leader in gas detection as a service, has been named a finalist for Advanced Manufacturing Company of the Year in the Pittsburgh Technology Council's Tech 50 Awards.

The annual awards programme recognises southwestern Pennsylvania's most successful, innovative and thought-leading companies and executives. The Council will name the winners at an awards event at the Wyndham Grand Pittsburgh on Thursday 10th October.

Industrial Scientific will display its latest gas detection products and services, including the all-new Tango TX1 gas monitor and iNet, at the "Tech 50 Showcase of Innovation" – a small trade fair designed to create more awareness about the awards finalists.
