

DRAEGER WILL BE EXHIBITING AT INTERSEC BOOTH 2-205 F

Draeger announces its participation in the 16th edition of intersec, the leading regional trade event in the security, safety and protection industries. Draeger experts will demonstrate key products in the fire, rescue and civil defence sectors, facilitating discussions on product features, service and maintenance options. Draeger has been operating in the Middle East for many years, offering medical and safety technology. With a regional headquarter located in Dubai, United Arab Emirates, Draeger is able to offer direct and local support to customers in the region with solutions for every area of application, from personal protective clothing and innovative gas measuring technology, to breathing protection systems and service solutions. ■

MICROGARD® 2300 - AGAINST CHEMICALS

Working with chemicals presents potential hazards every day. Microgard Limited, a specialist manufacturer of chemical protective clothing, is building a worldwide reputation to help solve problems for organisations that need to protect people working in challenging environments. MICROGARD® 2300 is suitable for use in a wide range of applications including environmental clean-up, chemical, pharmaceutical and composite manufacturing industries. The fabric combines an excellent barrier against many harmful chemicals while being lightweight and yet relatively strong and durable. MICROGARD® 2300 is available in bright yellow to help improve the visibility of workers on site. ■

SAUDI LEATHER INDUSTRIES COMPANY

SLIC was established in 1982, a joint venture with the American Wolverine Company and the Saudi Shoe Company.

In 1984, Saudi owners bought the market share from their American partner and became 100% a national company.

Initially SLIC focused on work and military footwear. In 1998, it took a step forward and added a new product, 'comfort shoe' for men. Starting from 2005, the company name changed to Saudi Leather Industries Company Limited and specialised in leather industrial products.

Today SLIC products hold a major share in the Saudi market, and a good share in the GCC market. SLIC is also penetrating a share in African markets. ■

3-POINT TRACEABILITY PADLOCK FROM LOTO SAFETY

LOTO Safety Products JLT launches the 3-Point Traceability Padlock (3PTP). It combines several innovative features to provide enhanced traceability and reduce downtime during enforcement of LO/TO programmes involving thousands of padlocks. 3-PTP addresses Padlock-to-Key traceability through 1. Key system engraved on key and molded on padlock body, 2. Key number engraved on key and padlock body, 3. Colour coded key jackets to identify a particular key to padlock by colour. Purpose designed key hole cover and polymer bushes mounted on padlock shackles resist ingress of moisture, dirt, grime and dust into padlock body. The traceability and weather resistant features make the 3-PTP Safety Padlock a versatile and preferred padlock in LO/TO programmes. ■

EXCITING NEW PARTNERSHIPS FOR RRC IN SUDAN

RRC Training Middle East (RRCME) has formed a joint partnership with two local training companies in Sudan, Bright On Training and Accent Training Language Centre, in a bid to spread awareness of the importance of workplace health and safety and of the training opportunities available in Sudan. Together with local trainers, RRC has effectively delivered the first IOSH Managing Safety and NEBOSH International General Certificate courses in Khartoum. The partnership is so successful that courses can now be run by Sudanese trainers independently, with support from RRC and use of shared resources, including marketing and administration. ■
