SOUND ADVICE

Visitors to Health & Safety North will be able to speak to Cirrus's team of fully trained noise specialists who will be showcasing their latest range of products designed and manufactured in the UK.

Cirrus will be demonstrating its Optimus range of high performance sound level meters, as well as doseBadge, the original wireless personal noise Dosimeter for occupational noise.

Group marketing manager James Tingay explains: "Cirrus Research offers a full calibration and service package that means all our customers meet the requirements of any standards or regulations they are working to and this is backed up with a 15-year warranty so there is real peace of mind with every Cirrus product."

COMPETITION AND GIVEAWAYS

As well as being able to explore the company's range of health, safety, environment and quality training products, visitors to RRC International's stand at Health & Safety North will have the chance to win prizes and receive giveaways.

Those who come to see RRC and register their interest in one of their courses will be given a pair of RRC-branded JSP safety glasses totally free (while stocks last).

They will also be offered the opportunity to enter a prize draw to win a free e-learning NEBOSH Health and Wellbeing Certificate course to help them further their careers.

In addition visitors will be able to take away samples of RRC's training materials and classroom and e-learning courses, which, together with RRC's trainers, have helped over one million people further their HSEQ careers.

NOISE AND VIBRATION RANGE

Svantek will be showing a wide range of high performance noise and vibration monitoring instrumentation at Health & Safety North 2014 including its newly launched SV103 – said to be the world's first personal vibration dosimeter that accurately measures the vibration dose received by the operator.

Svantek's SV103 is a small, rugged instrument which simply attaches to the user's arm whilst the lightweight MEMS accelerometer straps to the hand. The device features an easy to read colour OLED screen and all data can be quickly downloaded to a computer for analysis. The SV103 also has an additional contact force transducer that measures how firmly the tool is being gripped. Svantek's compact and robust SV104 personal noise dosimeter offers a wide range

of unrivalled features including octave band analysis for helping to select hearing protection, audio recording and full colour OLED screen. It also offers a revolutionary and virtually indestructible MEMS microphone and inbuilt tri-axial accelerometer for vibration shock detection. The company's SV104 personal noise dosimeter with octave band analysis and its SV971 sound level meter and SV106 eight-channel human vibration meter will also be on display. **Stand H33.**

LONE WORKER SAFETY SOLUTIONS

Skyguard will be showcasing its range of personal safety devices and Smartphone software. Visitors will be able to see live demonstrations of Skyguard's product range, including its iPhone app, which converts the handset into a fully functional personal safety device. The app is an expansion of Skyguard's range which includes software for Android, Blackberry, Symbian and Windows Mobile

handsets, as well as analogue phones.

Skyguard will also be demonstrating the MySOS – featuring GPS, GPRS, GSM and Mandown technologies. The key fob-sized MySOS, can be discreetly worn as a pendant, attached to a belt or keyring, or as an ID badge using the clip-on accessory. The MySOS is accredited to BS 8484 and ACPO's 'Secured by Design' scheme.

MASSAGING INSOLES

Walking on hard tiled or concrete surfaces takes its toll on the feet as well as the ankles, knees and lower back. This constant pounding can cause pain, discomfort and fatigue.

Often footwear offers no support to the arch and over time serious disorders like arthritis, heels spurs and plantar fasciitis can occur.

Sole Mates massaging insoles can help. Instead of using gel or foam they use a bladder of liquid glycerine as support for the foot. Moulding to the individual foot the insoles provide support to the arch as well as the foot heel and ball, spreading the weight evenly. The fluid acts like a shock absorber in the shoe.

The movement of the fluid gently massages the muscles in the foot, increasing the circulation and helping to reduce tiredness.

HANDS-ON ADVICE

Workers can expose their hands to a number of hazards that can impact on their ability to be able to carry out day-to-day activities at work.

Polyco, industry experts in hand protection, will be at Health & Safety North to showcase a new collection of gloves developed for workers, including: Monza, Imola, Polyflex Ultra, Grip It Oil, Grip It Oil C5 and Dyflex Plus N. As well as sampling Polyco's latest range of gloves, visitors will be able to find out about the company's Hand Protection Assessment Survey (HPAS). Free of charge to companies with 50+ employees, this service helps employers to identify the most suitable hand protection for the job. **Stand L34**
