

## ARCO HAS WORKER SAFETY IN HAND

Arco has launched the new Household Grip Glove to help keep workers' hands safe from harm in a range of food processing and cleaning environments.

The Arco Household Grip Glove combines the 'second skin' benefits of a disposable glove with the strength and durability of household gloves.

The new design includes patented grip technology, a first for the household gloves market. It takes the form of a diamond-shaped grip pattern on the outer shell of the glove that extends through to the inner shell, ensuring a very secure grip. This technology works alongside a new ergonomic shape that has been developed by Arco's team of experts to ensure that the glove fits more closely to the shape of the hand, reducing friction and increasing wearer comfort.

Developed with the wearer in mind, the new Household Grip Glove has been constructed from a material that uses a unique nitrile recipe. This ensures that the glove is flexible and lightweight, in addition to providing good value in terms of cost versus wear life. The new glove has also been food approved, making it ideal for use

in controlled environments such as food manufacture and preparation.

Its latex free properties also enable use in designated latex free sites often required by food producers and supermarkets. In addition, the Household Grip Glove meets the EN 374 standard for 'gloves giving protection from chemicals and micro-organisms', enabling its use across a range of moderate cleaning tasks.

Paul Lyons, Product and Procurement Manager for Gloves at Arco, commented: "The new Household Grip Glove launched in Arco's Big Book catalogue for 2015 complements our extensive gloves

range and offers a step up from previous solutions available on the market. As the first safety distributor in the UK with our own in-house, independently accredited product assurance laboratory, Arco has also been able to test all gloves in the range, including the Household Grip Glove, to ensure they meet the robust quality and safety standards that our customers expect."

As part of Arco's commitment to safety it has produced a household gloves leaflet and offers advice and guidance on gloves selection through its dedicated in-house glove expert.

## TRAIN UP WITH RRC INTERNATIONAL AT THE HEALTH & SAFETY EVENT

Visitors to stand F2 at the Health & Safety Event in Birmingham, on 24th to 26th March 2015, will be able to explore RRC International's large range of health, safety, environment and quality training products, chat to their experienced staff, and will be in with a chance to win prizes.

Those who visit RRC and register their interest in one of the company's world-renowned courses will also be

given a pair of highly-effective RRC-branded JSP safety glasses totally free (while stocks last).

Attendees will also be offered the opportunity to enter a prize draw to win a free e-learning NEBOSH Certificate level course of their choice to help them further their careers.

And, of course, visitors will be able to take away samples of RRC's training materials and classroom and e-learning courses, which, together with RRC's skilled and proficient trainers, have helped hundreds of thousands of people to further their HSEQ careers worldwide.

Gareth Lewis, Head of Corporate Client Relations at RRC

International, commented: "We are once again looking forward to welcoming visitors to our stand at The Health & Safety Event. Come and meet our talented, knowledgeable and friendly team, who will all be very happy to offer those looking to develop their careers in HSEQ the benefit of our advice and guidance to help them realise their full potential."
