- Lift, Truck and Warehouse Safety
- Manual Handling
- Noise
- PPE
- Slips, Trips and Falls
- Spill, Prevention and Control
- Stress
- Working at Height

Safety Media e-Learning Courses

Course Structure

The Safety Media short e-Learning courses are hosted on a simple-to-use learning platform. The courses consist of three different formats: interactive, video and refresher courses.

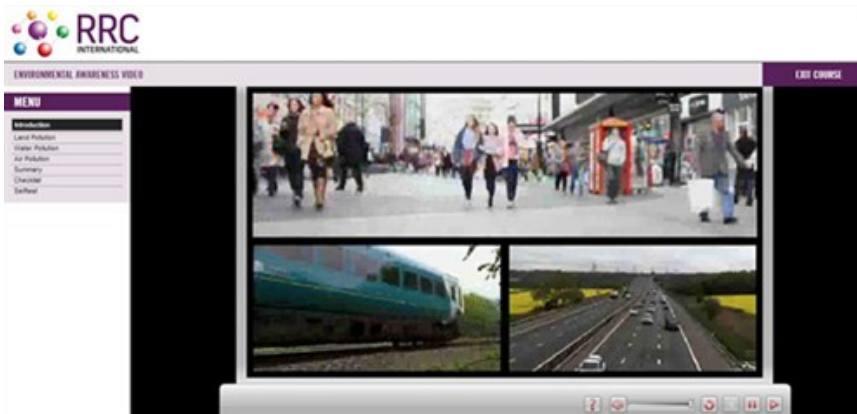

Interactive

Interactive courses consist of short, easy-to-follow slides, with information delivered in a helpful bullet point format. Students are able to engage with the course content by clicking on boxes and diagrams for further information.

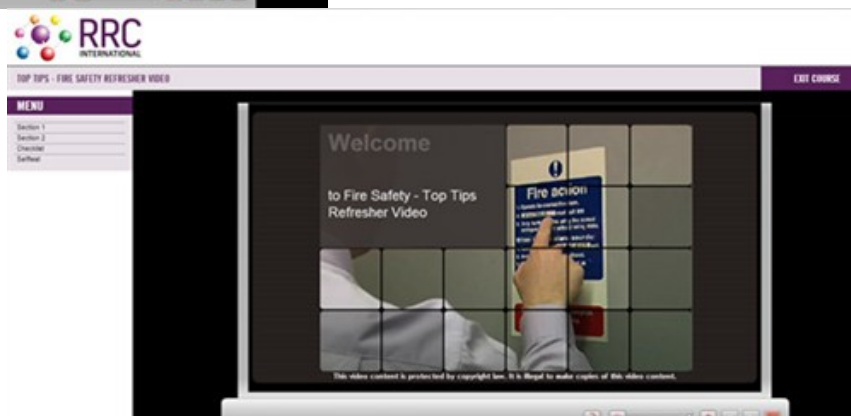

Video

These short videos take students through the course materials in an engaging and interesting format, providing visual examples of how to implement key health and safety practices.

Refresher

Refresher courses break down health and safety topics into key points, acting as a reminder for those who already have some knowledge of these subjects.

Assessment

Each course is examined by a short test, which cannot be completed until the whole course has been accessed. Once the test is passed, a certificate will be available to print.

On completion of the course, there is also a checklist for students to fill in. This brings a practical element to the course, relating the content to experiences within the student's own workplace.
