

## PRECISION SAFETY AND COMFORT WITH OCEAN SHOE

Solid Gear continues to modernise PPE footwear with a safety shoe that looks and feels more like a trainer.

Combining a lightweight athletic look and superb safety features, the new OCEAN safety shoe is ideal for workers who are constantly on the move.

The shoe's midsole is made of a poured PU rather than a traditional injected PU to give a more cushioned feel underfoot, while the thick rubber outsole provides a high level of anti-slip protection and durability.

With an eye-catching style, the shoe's BOA comfort fastening delivers a better overall fit making it easy to take the shoe on and off. Added to which, the shoe's fibreglass toecap and ballistic midsole combine with the other protection features and anti-static properties to deliver S3 protection

So, get to know more about the quality and innovation plus the top-class safety functionality in every Solid Gear product – your feet will notice the difference.

## NEW AND IMPROVED ONLINE NEBOSH, IOSH & IEMA COURSES FROM RRC

RRC's Tutors and Course Development team have been working hard on a major upgrade of their online courses. These new courses significantly improve the learning experience and initial analysis suggests they provide better completion and success rates.

The advantages of online learning are well understood - flexibility and accessibility, study when you want and where you want. On the flip side there is the issue of self-motivation or discipline, which is essential for successful study at a distance.

These courses have been developed using RRC's 90 years of experience in teaching at a distance and with the help of experienced online learning experts. The

result is a learning platform and courses that provide a highly effective learning experience.

The online courses comprise a series of video lessons, delivered by RRC's tutor team, with further reading provided in e-book format. Along with this, students receive a full PDF copy of the course study texts which can be downloaded to multiple devices for offline study. Further resources include law guides and a comprehensive glossary of health & safety and environmental management terminology

Ongoing assessment is built into the course to both reinforce the learning and prepare for the final exam. And most importantly, there is unlimited tutor support from RRC's expert team of tutors through e-mail and course forums.

To demonstrate what the courses are really like, the RRC website features a new short video, which covers all the aspects and benefits of RRC's online learning platform, and free course trials. Plus, all RRC online courses have a 30-day money back guarantee.

Gary Fallaize, RRC Managing Director commented: "I am really pleased with what we have achieved here. Student feedback is very good, the tutors really like the courses and we are seeing all round improved performance, student motivation, and those all-important exam results."
