

Lloyd's Register sponsors IOSH event

Lloyd's Register (LR) is delighted to be sponsoring IOSH Conference 2019 and exhibiting at the event, which will be held on 16-17 September 2019 at the ICC in Birmingham.

James Pomeroy, Group HSES Director at Lloyd's Register, is speaking at the event about future risks, challenges and opportunities. His presentation 'Enabling change – leading OHS into the new world of work' will look into OHS challenges that are now among us, such as mental health, wellbeing and sustainability, and require practitioners to develop different skillsets and capabilities. James will use examples, insights and stories to explain what these changes mean for practitioners.

New NEBOSH HSE course from RRC

RRC has announced it will offer the NEBOSH HSE Introduction to Incident Investigation – a short course developed between the HSE and NEBOSH – in four new venues in 2020: Birmingham, Leeds, Manchester and Newcastle.

Designed to enable learners to be able to carry out solo accident investigations, produce risk control plans and contribute to team accident/incident investigations for large-scale investigations, this course aims to challenge learners to not only ask how an incident occurs, but why – shaping a more resilient health and safety culture with reduced incidents as a consequence.

Cority expands strategic partnership

Software provider Cority has expanded its strategic partnership with EHS regulatory content provider Enhesa, to provide the most comprehensive

global compliance management solution in the market.

Building upon the long-term partnership between Cority and Enhesa, the expanded relationship demonstrates a stronger commitment on a global scale and further deepens Cority's compliance management offering. With seamless integration of Enhesa's robust regulatory content – spanning over 290 jurisdictions worldwide – into Cority's unified true SaaS platform, organisations can now leverage a single solution for global compliance coverage.

Should you be providing eyecare?

The widespread use of smart phones means that people are using display screen equipment more than ever in the workplace,

so it's important that eyecare policies keep pace – particularly as smart phones come under the DSE regulations, says Specsavers Corporate Eyecare.

Research among 500 UK HR decision makers, including 135 in large businesses and 365 SMEs, revealed that just 2% of respondents said employees did not use a screen, including smart phones, for work purposes. The findings also showed that 88% of respondents said employees spend on average an hour or more each day looking at screens.

Hotter takes comfort with Orthomat

Orthomat anti-fatigue matting from COBA Europe has been installed by shoe manufacturer Hotter at its Skelmersdale headquarters and manufacturing site in Lancashire.

The matting, supplied by COBA via ARCO, has been introduced to enhance the comfort and wellbeing of its employees who work in Hotter's busy production facility.

The decision to install Orthomat follows a survey conducted by Hotter, which revealed that staff carrying out repetitive actions, such as standing in a static position, were twice as likely to experience work-related absence, such as a fatigue, foot and muscular pain, compared to those roles where walking and movement were present.

Orthomat Standard is one of COBA's best-selling anti-fatigue mats and just one option from an extensive range.
