

CITB Safety Plus

RRC provide a range of CITB course from the Site Safety Plus Scheme which provides building, civil engineering and allied industries with a framework for training and career development for all levels of the workforce. RRC's CITB courses cover the complete CITB syllabus, providing the knowledge need to pass first time.

CITB Site Supervision Safety Training

The CITB Site Safety Plus Site Supervision Safety Training Scheme (SSSTS) provides an understanding of the employer's legal duties to enable better contribution to the instruction, supervision and monitoring of tasks and activities to ensure safety on site. It is designed for those who have supervisory responsibilities within the construction industry and is suitable for first line managers, foreman, team leaders and supervisors.

Course Content

The CITB Site Supervision Safety Training course covers:

- The problems of the construction industry
- How health and safety law is structured and how it applies to supervisors
- How the supervisory roles fit with the management structure controlling site safety
- How to carry out risk assessments and the need for method statements
- How to carry out effective site inductions, toolbox talks and method statement briefing
- How to monitor site activities effectively
- The importance of timely intervention when bad practice is identified

Assessment

The CITB Site Supervision Safety Training course is assessed by a short multiple choice exam and a tutor review, which may include short-answer tests, oral questions and answers, simulated practical exercises, role-play and problem-solving activities.
