

RRC's ISO 14001 Environmental Management Systems

ISO 14001:2015 is the world-leading International Standard covering Environmental Management Systems and specifies requirements for any organisations seeking to improve its environmental performance and manage its environmental responsibilities. The standard applies to the organisation's relevant activities, products, procedures and services with guidance for use and clear requirements on consideration of life-cycle perspectives.

This course is ideal for middle management, line managers and individuals from a quality and/or health and safety background looking to understand, implement and maintain an Environmental Management System (EMS) in their organisation.
