

RRC's ISO 45001 Occupational Health & Safety Management Systems

ISO 45001:2018 covers Occupational Health & Safety, and offers a framework for all organisations looking to improve workplace safety and prevent workplace accidents and associated ill health. The standard covers Occupational Health and Safety Management Systems, with guidance for use and clear requirements on providing a safe and healthy workplace.

This course is aimed at those in top levels of management, and follows best practice which will bring significant benefits as well as ensuring compliance with legislation.
