

THE ITALIAN JOB

U-Power, a manufacturer of high performing safety footwear and clothing, will exhibit its latest range of Italian-designed protective wear at the Safety & Health Expo.

U-Power's stylish and durable, premium safety clothing is created from inception through to production by leading sportswear and fashion designer Maria Teresa Castelli. Expo 2014 will be the first time that U-Power's comfortable, sporty and functional products will be showcased at a UK event.

Visitors to U-Power's stand will be able to see much of its chic work-to-leisure clothing and footwear, including a new GORE-TEX footwear range. Also new, is U-Power's PS1 range of colourful, lightweight and technical workwear that is designed to provide all-day comfort and protection in warmer conditions.

Visitors to the stand can enter a prize draw to win an item of clothing.

THE RIGHT PRESCRIPTION

Cirrus Research is taking its Noise Doctor advisory clinic to the Safety & Health Expo where its team will offer advice, information and product demonstrations on a range of sound level meters, noise dosimeters, training courses and noise warning signs. Key products

on show include: Optimus Sound Level Meters, which are suitable for noise at work and environmental noise measurements; the doseBadge Noise Dosimeter, for measuring and assessing the noise exposure of mobile workers or anyone working in hazardous environments; and the SoundSign Noise Warning Sign, which is suitable for informing and warning employees about high noise levels in the workplace.

Delegates will also be invited to participate in the new version of the popular "HOW Loud?" competition with prizes worth up to £1,000.

DEMOS & PRIZE DRAWS

RRC will again be taking to the floor at this year's Safety & Health Expo. Visitors to RRC's stand can find out more about the company's extensive knowledge and experience of health, safety and environmental training. They will also be given information, samples and free demonstrations of RRC's ever-expanding range of NEBOSH, IOSH, IEMA, CQI and CITB courses; and information on

RRC's Learning Centre, through which its new IOSH Working Safely e-learning course has just been launched.

On each day of the show, the first 250 people who register their details on the stand will receive a free pair of stylish JSP Stealth 9000 safety glasses. There will also be a daily prize draw for a FREE NEBOSH Certificate e-learning course of the winner's choice, and the chance to win a free NEBOSH Diploma e-learning course.

HALF CENTURY OF HEAD PROTECTION

JSP is inviting visitors to the Safety & Health Expo to join in celebrations that will be taking place on its stand to mark 50 years of 'Manufacturing for Safety'. JSP will also be giving interactive demonstrations of face-fit testing for a number of its respiratory protective devices using FFRED, the new HSE RPE demonstration model, as well as performance testing of JSP's new Premier Shield and Hardia+ lens coating technologies for its protective eyewear.

Other products JSP will be showcasing include the Press To Check P3 filter technology that enables instant face-fit testing of JSP's Force 8 half-mask, the K2 Height Safety Range, the Thermex Goggle, Stealth Hybrid - a combination spectacle/goggle protection solution; and the Skyworker Helmet, which provides enhanced crown and side impact protection.

JSP will receive the Frost & Sullivan Market Leadership European Head Protection Award 2014 for its commitment to providing outstanding industrial head protection products and customer service at 5pm on Wednesday 18 June.

ELECTRICAL TESTING MADE EASY

At Safety & Health Expo, **Seaward** will show how its latest innovations in maintaining electrical safety at work can be integrated as part of a broader, risk-based health and safety management approach. In line with recent HSE and IET guidance, Seaward's new Apollo 600 establishes a new approach to portable

appliance testing. The multipurpose tester is equipped with onboard risk assessment tools to assist the user in taking a proportionate response to the inspection and testing of electrical equipment.

The Apollo 500 and Apollo 600 testers can also create special user defined documentation to record and store all the vital information associated with other workplace health and safety assessments. This feature is included alongside a suite of electrical tests and a high quality digital camera that enables images taken during visual inspections to be tagged against assessments for full record keeping and traceability purposes.

FLOOR SAFETY MATTING

At the Safety & Health Expo, **COBA** will launch a new floor safety product that is designed to deliver many user benefits and impressive performance. The new product, which will be officially unveiled at the exhibition, has been dubbed as "one of the most significant products to be added to COBA's safety matting range in many years," Chris Stanley, COBA Europe's sales director, says.

COBA will also be exhibiting its full range of safety matting designed

to reduce slips and improve comfort from prolonged standing in the workplace, as well as its COBAGriP family of GRP anti-slip sheeting and stair treads.
