

UVEX PHYNOMIC GLOVES RANGE FOR PRECISION WORK

Perfect fit, optimum function and absolute purity. The uvex phynomic safety glove is setting the standard among knitted safety gloves for precision work.

Perfect fit is the first dimension. The uvex phynomic safety glove fits like a second skin and, together with the revolutionary uvex 3D ergo technology, this allows for precision and a natural dexterity while maintaining complete freedom of movement, especially when the work involves filigree components or small objects. At the heart of the 3D ergo technology is a combination of a 15-gauge, fine knit liner based on polyamide and elasthane and a new, elastic, aqua polymer coating. The special, anatomically formed 3D ergo hand shape creates the basis for the perfect fit. ■

40 YEARS' EXPERIENCE IN PROTECTIVE WEAR

AJ Charnaud & Company (Pty) Ltd has, since its foundation, been at the forefront of the development and manufacturing of personal protective clothing. With a complete head-to-foot range of certified products, supported with advanced professional and technical assistance, Charnaud is regarded as a leading global supplier of personal protective clothing for flame, heat, molten metal and electric arc flash protection and some hazardous liquids in flammable environments. Today the Charnaud Group exports its personal protective clothing worldwide to protect workers across five continents. As Charnaud continues to grow, more focus is placed on brand consistency and product quality. Products are certified in South Africa, with most products also carrying international certification. ■

CONNEXT SAFETY SOLUTIONS DRIVING UP ON-SITE SAFETY

ConneXt Safety Solutions combines 24/7 remote atmospheric monitoring, GPS-based man-down tracking and real-time data delivery to a central location, driving up on-site safety and productivity. Developed by a global engineering team led by Honeywell Analytics, ConneXt empowers plant managers with real-time information to identify gas leaks faster than ever before. Plant managers will be better prepared to protect their workforce using ConneXt's ability to pinpoint threats using accurate gas concentration level and location data. ConneXt can prevent a safety incident from becoming a disaster, potentially saving lives, reducing plant downtime, and avoiding potential regulatory fines and liability costs. ■

SAUDI LEATHER INDUSTRIES COMPANY

SLIC is a Saudi Arabian company that has grown to become one of the leading suppliers of industrial safety, work and security/defence footwear in Saudi Arabia, the Gulf, Middle East and Africa. SLIC footwear is not just tough, it is among the most comfortable industrial footwear available. As a matter of fact, by utilising the latest technologies, SLIC produces high performance, flexible and high quality work footwear. SLIC proudly meets high safety standards, yet the company is committed to much more. SLIC is dedicated to the production of occupational footwear. Only high levels of worker comfort and safety are accepted, for example, through the use of composite toes. It is because of these high standards that all SLIC products offer a six month guarantee against manufacturing defects. ■
