Introduction to ISO 14001
Environmental Management Systems

Introduction to ISO 14001 Environmental Management Systems

The Introduction to ISO 14001 Environmental Management Systems course provides an overview of environmental management systems (EMS) including the different types and their benefits, as well as information about implementation and operation. The course is aimed at those wanting to gain an understanding of EMS, particularly ISO 14001 and the European Eco-Management and Audit Scheme (EMAS) and is ideal for:

- middle management
- line managers
- individuals from a quality and/or health and safety background

Completion of the IEMA Introduction to Environmental Management Systems course will gain credit towards an Environmental Auditor application on the IEMA’s Environmental Auditor register.

Course Content
The Introduction to ISO 14001 Environmental Management Systems course covers:

- An overview of the background to EMAS and the ISO 14000 Series.
- The Key components of ISO 14001.
- The Key components of EMAS.
- The Interface between EMAS, ISO 14001 and other management systems.
- Sources of further information or advice.

Assessment
The Introduction to ISO 14001 Environmental Management Systems is assessed by a multiple choice end of course assessment. Learners will have 2 attempts to pass the end of course assessment.
